Step 2 – Review Categories

We've detected the following menu categories from your uploaded menu. Review, edit, accept or reject them.

| Accept all | Reject all | + Add category |

Category name	Status	Confidence	
Starters	Accepted	0.92	Remove
Mains	Accepted	0.95	Remove
Desserts	Accepted	0.78	Remove
Beverages	Rejected	0.51	Remove

| Back | | Next |

Step 3 – Review Subcategories

Subcategories detected within each accepted category. Accept, reject, rename, or add more. If none are detected, you can continue.

No subcategories detected?
That's ok — you can proceed without subcategories or add some manually.

[+ Add subcategory] [Continue]

Mains 3 detected

[+ Add subcategory]

Subcategory name	Status	Confidence	
Pasta	Accepted	0.87	Remove
Pizza	Accepted	0.83	Remove
Grill	Rejected	0.55	Remove

Desserts 0 detected

[+ Add subcategory]

No subcategories under Desserts. You can add one or continue.

[Back] [Next]

Step 4 – Review Sizes

Sizes detected from the menu. Sizes can be global or scoped to a category or subcategory.

| Global Sizes | By Category | By Subcategory |

Add new size (e.g. Small, 12 inch)   **+ Add size**

Size name	Scope	Status	
Small	**Global**	Accepted ⌄	Remove
Large	**Global**	Accepted ⌄	Remove
10 inch	**Pizza (subcategory)**	Accepted ⌄	Remove
12 inch	**Pizza (subcategory)**	Accepted ⌄	Remove

Back   Next

Step 5 – Review Attributes (Modifiers)

Review all modifiers detected across the menu. Ingredient attributes are multi-select add-ons or defaults. Base attributes are single-select options and will be grouped per item in Step 6.

Ingredient Attributes
Defaults & add-ons (multi-select)

+ Add

Name	Status	Conf.	
Cheese	Accepted	0.90	Remove
Mushrooms	Accepted	0.86	Remove
Olives	Rejected	0.62	Remove

Base Attributes
Single-select base options (grouped per item in Step 6)

+ Add

Name	Status	Conf.	
Milk	Accepted	0.78	Remove
Soy Milk	Accepted	0.73	Remove
Crust	Accepted	0.81	Remove

Note: Base attribute grouping (Base 1 / 2 / 3) is configured per item in Step 6.
